Iowa Bridge Hydraulics v2 Installation Instructions

Download the file: Iowa Bridge Hydraulics Install.zip

After unzipping the file you will find it contains a folder:

Iowa Bridge Hydraulics Install Files

This folder contains the install files.

Copy this folder and the files it contains to your hard drive. It is recommended you copy it to your C: drive. Running the installation from the desktop will generally not work.

Migrate to the folder using MyComputer or Windows Explorer.

Double click on the file, setup.exe, in the folder. This will start the installation software. Follow the installation instructions to install the software.

An example data file, Example Problem v2_1.ibh, is installed as part of the installation. If you wish to examine the software without having the enter data, after you start up the software you can open this example file.
